

Door Collection

Welcome

To The Formula One Range™ Door Collection.

We hope that our comprehensive choice of luxurious and high security doors will assist you in making a choice on the colour and design option that suits your home.

We are confident that you will be satisfied with our products as we only offer what we believe to be the best choice for our customers. Our doors are manufactured utilising a high density foam core, which offers excellent strength and thermal performance and a durable Glass Reinforced Plastic (GRP) skin to protect from the elements. GRP is the same material that is used to make the hull of life-boats - demonstrating just how tough it really is! All door skins are through colour, therefore providing scratch against colour resistant.

Please use this brochure as a choice option for you, should there be any other designs that you have seen that you also like, please do not hesitate to speak to our authorised installer/dealership who will be happy to help you find the right door choice for you.

Glazing Options

STAINED UNITS

All stained units are individually hand-made. If you do not see the design you would like in this brochure we would be happy to discuss your requirements.

SANDBLAST/ETCHED GLASS

This handcrafted glass is designed to give a traditional appearance. Though generally obscure, it does leave various areas clear.

BEVELLED GLASS

4mm shaped and polished glass facets, handcrafted and bonded to the glass with an optically clear resin then overlaid with lead.

RESIN BEVEL

Resin bevels should not be confused with traditional bevels. Each resin is obscure and the design will occasionally produce minor imperfections that are generally regarded as acceptable.

IMPORTANT NOTICE

PCV-u Infill Door Panels as illustrated in this brochure may not appear exactly the same in every case when fitted. This brochure has been compiled using an average opening width for demonstration only.

The area of panel, which is visible around the raised and fielded sections, is determined by the actual brickwork opening on your particular property.

Wider openings will produce more of a border than a narrow aperture – likewise a narrow opening will have less visible border.

Variations in colour and patterns do occur to those illustrated due to manufacturing and printing limitations. The company reserves the right to change the product range without prior notice

The majority of composite doors are white outside frame, however please be advised that outside frame foiling colours may differ to the door sash/slab as the manufacturing process is a different technique

Please return this brochure to showroom when finished in the interests of saving a tree. Alternatively, please pass to a friend who may find this leaflet interesting. Thanks!
